## C ntinuation 9h t (PTO-303) 009/486,719

Continuation of 3.

Applicant's reply has overcome the following rejections: 35 U.S.C. 112, second paragraph rejections of claims 16, 18 and 35.

Continuation of 5. does NOT place the application in condition for allowance because:

Applicant's arguments were not persuasive.

Regarding applicant's argument that none of Demiryont, Choi, Allemand, and Byker disclose a coating for attenuating/modifying the color of the glazing in reflection, the applicant is directed to the Final Office Action mailed 12/18/2002 (page 4, lines 14-21 (Demiryont), the paragraph bridging pages 7 and 8 (Choi), page 10, lines 15-20 (Allemand), and the paragraph bridging pages 13 and 14 (Byker)).

Regarding claims 19-20, the examiner asserts that absent a showing of unexpected results, it would have been obvious to one having ordinary skill in the art at the time the invention was made to make the coating for attenuating/modifying the color from any suitable material, because it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use. The examiner directs the applicant to the disclosure of Demiryont (column 7, lines 36-52). Demiryont discloses that it is within the ability of those skilled in the art to select a suitable material for the color control layer to achieve both enhanced uniformity and desired hue or color of the coated article.

Regarding claims 23-24, the examiner contends that the applicant has failed to supply any basis for why the rejection of the claims is allegedly improper.

Regarding the comparative data supplied by the applicant, the examiner directs the applicant to 'Response to Arguments' section on page 16, line 13, through page 17, line 10, of the Final Office Action mailed 12/18/2002.
